Although BWA is a very popular and well tested aligner, it's hardly the only aligner around. There is an extensive list of open source and commercial short read aligners available on Wikipedia.

Understanding MAPQ scores in SAM files: does 37 = 42? - ACGT

BBMerge is designed to merge two overlapping paired reads into a single read. For example, a 2x150bp read pair with an insert size of 270bp would result in a single 270bp read. This is useful in amplicon studies, as clustering and consensus are far easier with single reads than paired reads, and also in assembly...

Seqanswers : SEQanswers Home

Home. Question about the working directory. TDT. August 2013. Hey all, I found a post on seqanswers asking about this, and tried searching the forums here for that post, but couldn't find it. I hope this question isn't redundant. I'm using Linpad 4, and really like it. A problem I'm running into is related to the working directory.
