agreed announce you additional event to read. Just invest tiny time to entre this on-line message similarity and congruence exercises question answers as with ease as review them wherever you are now.

Note that some of the “ free ” ebooks listed on Centsless Books are only free if you ’ re part of Kindle Unlimited, which may not be worth the money.

### GCSE: Congruent Triangles

This page covers congruency and congruent triangles. Two shapes are congruent if they are the same (shape and size)- in other words, if the lengths of the sides and the angles are the same. It is often useful to know when two triangles are congruent.

## Get Free Similarity And Congruence Exercises Question Answers

Two triangles are congruent if any one of the following is true:

Similarity | High school geometry |  
Math | Khan Academy

Example of using similarity and  
congruence to find the area of a  
triangle Practice this lesson yourself  
on KhanAcademy.org right now:

Use similar & congruent triangles  
(practice) | Khan Academy

The two shapes below are said to be similar. This means that they are the same shape but can be different sizes, i.e. they have the same proportions. If you move, rotate, reflect, or change the scale of the shape on the right in Fig.3 below, the two shapes will still be similar. Click on the figure below to interact with the model.
