• **Simulation refers to a broad collection of methods and application to mimic the behaviour of real system usually on a computer with appropriate software.** • **A bank with different kinds of customers, servers, etc.** • **Arena combines modules to build a fairly wide variety of simulation models.**

SIMULATION WITH ARENA

Discrete Event Simulation. Discrete event simulation describes a process with a set of unique, specific events in time. These flexible, activity-based models can be effectively used to simulate almost any process. For 30 years, Arena has been the world's leading discrete event simulation software.
