### **Troponin - Understand the Test & Your Results**

Troponin, or the troponin complex, is a complex of three regulatory proteins (troponin C, troponin I, and troponin T) that is integral to muscle contraction in skeletal muscle and cardiac muscle, but not smooth muscle. Blood troponin levels may be used as a diagnostic marker for stroke, although the sensitivity of this assay is low. Assays of cardiac-specific troponins I and T are extensively ...

### **Aligning Test Items with Course Learning Objectives**

Troponins are a group of proteins found in skeletal and heart (cardiac) muscle fibers that regulate muscular contraction. Troponin tests measure the level of cardiac-specific troponin in the blood to help detect heart injury. There are three types of troponin proteins: troponin C, troponin T, and troponin I. Troponin C initiates contraction by binding calcium and moves troponin I so that the ...
