**Principles of Personality Development in Childhood**  
Human behaviour - Human behaviour - Personality and social development: Several theories of personality development stress that adulthood and aging are periods of qualitative change, of discontinuity, and of transformations of earlier life patterns. These changes are believed to arise in relation to the demands of the person's changing biological status and social context—the family, the ...

**Personality and Personality Development - An Overview**  
However, the effects of social roles on personality trait development will be moderated by the individual's investment in them. The social investment principle suggests that environments will have a stronger influence on an individual's personality when he or she is committed to a social role and is willing to invest mental or physical effort into maintaining it ( Roberts & Wood, 2006 ).

**The Psychology of Personality Formation**  
Social changes are particularly notable as adolescents become more autonomous from their parents, spend more time with peers, and begin exploring romantic relationships and sexuality. Adjustment during adolescence is reflected in identity formation, which often involves a period of exploration followed by commitments to particular identities.
