Child Development in Context - oup.com.au

Child development refers to the biological, psychological, and emotional changes that occur in humans between birth and the end of adolescence, as the individual progresses from dependency to increasing autonomy. Culture plays an important role in influencing this development, and what is considered "normal" development varies greatly from one culture to the next.

Societal Contexts of Child Development: Pathways of ...

In the past half century, contextual models of child development have risen to prominence, and contexts beyond the home environment have been increasingly recognized as important to children's development. During this same period, a number of social trends have significantly impacted the daily lives of children, including major shifts in gender roles and expectations; the emergence of an ...
