The earliest known reference to the knight's tour problem dates back to the 9th century AD. In Rudra?a's Kavyalankara (5.15), a Sanskrit work on Poetics, the pattern of a knight's tour on a ha board has been presented as an elaborate poetic figure (citra-ala?k?ra) called the turagapadabandha or 'arrangement in the steps of a horse'. The same verse in four lines of eight syllables

The kernel is a computer program at the core of a computer's operating system and has complete control over everything in the system. It is the "portion of the operating system code that is resident in memory", and facilitates interactions between hardware and software components. On most systems, the kernel is one of the first programs loaded on startup (after the bootloader).
