The result is a manual containing solutions to some 280 problems selected from the third edition. The original idea of producing an instructor's manual first came from RKP's friend and colleague Wing-Ki Liu in the 1990's when RKP had just embarked on the task of preparing the second edition of Statistical Mechanics.

Solution 2.1: (a) The differential is exact,  $u(x;y)=\int \arctan(x=y)$ . Here one point worth discussion. The function  $u(x;y) = \int \arctan(x=y)$  has a singularity at  $x = 0; y = 0$ . As a result, any close path embedding this point contributes 2π to the vari-ation of the quantity  $u(x;y)$ . Consequently, this function cannot serve as a thermodynamic
