*LabCorp Solutions :: Registered User Login
The secret to success with the Suspension Lab (Oobleck) is the students' ability to follow precise multi-step instructions, using scientific equipment to correctly measure required amounts of corn starch and water. I typically wander around the classroom and adjust their mixtures depending on if the student's oobleck is too runny or too dry.*

A solution is a special type of mixture that is homogeneous, where you cannot tell the difference between the components. A solution is also a special type of mixture that cannot be separated via mechanical means - filtering, screening, etc. In most cases, a solution has different properties than the two or more parts that went into making it.

CCNA Lab Activities - ICT Community

If a solution is created, the student will determine how much material is needed to saturate the 50 ml of water. Along with this, they will explore their ability to dissolve the saturation amounts of the two materials at the same time. They will look for chemical reaction between the water and the materials and if a precipitate is present.
