Print() just sends the current form to the local print dialog. You would still need to select Print to PDF rather than a regular printer and provide a file name. If I have answered your question, please mark your post as Solved.

Solved: Microsoft Print to PDF Missing on Windows 10, 8, 7

I think this would fit neatly into the "too hard basket". I think I would rather just curse MS, write-off Microsoft Print to PDF as just another one of those things that don't work (it used to be that dastardly HOMEGROUP before even MS gave up on it), and use a 3rd party PDF printer like I have already done for so many years.
