DIY Speaker Building Guide

Bookshelf speakers generally use the same tweeter and mid-bass driver as a floor-standing model of the same series. The key difference is placement flexibility. Many bookshelf speakers can be placed on stands, mounted to the wall, or put on top of a piece of furniture. Bookshelf speakers don't play as deeply as larger speakers.

A 5.1 system has left, right, and center speakers in front, with left and right surround speakers. A 7.1 system adds left and right rear surround speakers. A 9.1-channel system adds front height speakers to take advantage of Dolby Pro Logic® IIz, which derives height information from the signal.

Speakers Guide

Bookshelf speakers are a great place to start when building your setup. Similar to floor speakers, bookshelf speakers usually offer less bass response, while the compact size allows you to fit them in smaller spaces. Placing the speakers on stands will provide the best audio quality, since the added height aims the sound directly at your ear.
