Internet addiction appears to be a common disorder that merits inclusion in DSM-V. Conceptually, the diagnosis is a compulsive-impulsive spectrum disorder that involves online and/or offline computer usage (1, 2) and consists of at least three subtypes: excessive gaming, sexual preoccupations, and e-mail/text messaging .All of the variants share the following four components: 1) excessive use ...

Spectrums Handbook For General Studies

For most of history, visible light was the only known part of the electromagnetic spectrum. The ancient Greeks recognized that light traveled in straight lines and studied some of its properties, including reflection and refraction. The study of light continued, and during the 16th and 17th centuries conflicting theories regarded light as either a wave or a particle.

Electromagnetic spectrum - Wikipedia

Selective serotonin reuptake inhibitors (SSRIs) are a class of drugs that are typically used as antidepressants in the treatment of major depressive disorder, anxiety disorders, and other psychological conditions.. SSRIs increase the extracellular level of the neurotransmitter serotonin by limiting its reabsorption (reuptake) into the presynaptic cell. They have varying degrees of selectivity

Issues for DSM-V: Internet Addiction | American Journal of ...

Studies that have evaluated such teams found that they had arrest rates ranging from 2 to 13 percent (with an average of less than 7 percent) (37,41), in contrast to an arrest rate of 21 percent for contacts between nonspecialized police officers and persons who were apparently mentally ill . This finding lends credence to the idea that a ...
