Is spirometry essential in  
diagnosing asthma? No |  
British ...

Spirometry is one of the  
most common of the pulmonary  
function tests (PFTs),  
measuring lung function,  
specifically the amount  
(volume) and/or speed (flow)  
of air that can be inhaled  
and exhaled. Spirometry is  
an important tool used, in  
combination with the  
clinical picture, for  
diagnosing and assessing  
conditions such as asthma,  
COPD, pulmonary fibrosis and  
cystic fibrosis.
