Spring Data JPA Tutorial: Introduction - Petri Kainulainen
Spring Framework has always had a good support for different data access technologies. However, developers had to use technology-specific APIs, which often led to a situation where a lot of boilerplate code had to be written in order to implement even the simplest operations. Spring Data changed all ...

Spring Data JPA Tutorial - Petri Kainulainen
What Spring Data JPA Is? Spring Data JPA is not a JPA provider. It is a library / framework that adds an extra layer of abstraction on the top of our JPA provider. If we decide to use Spring Data JPA, the repository layer of our application contains three layers that are described in the following:
