Pars Plana Vitrectomy: Overview, Indications ...

Removal of vitreous gel (Vitrectomy) is done to repair many of the retinal disorders, which were previously considered inoperable. The procedure is done through three tiny incisions in the eye for three separate instruments. These incisions are placed in the pars plana of the eye, which is located between the iris and retina.

Smart Traveler Enrollment Program

What To Expect After A Vitrectomy. Because so many variables are involved, only your eye surgeon familiar with your condition can give you a realistic idea of what to expect following a vitrectomy. But the underlying reason for the procedure usually is a major factor in determining how fast you will recover as well as the ultimate outcome.
