The Coulomb's Law Interactive allows learners to explore the force of attraction or repulsion between two charged objects. The quantity of charge on the objects can be varied by dragging a slider. And the objects can be dragged closer together or further apart. The distance between objects can be measured using a built-in measuring tool.

Student Exploration Balancing Chemical Equations

Practice balancing chemical equations by changing the coefficients of reactants and products. As the equation is manipulated, the amount of each element is shown as individual atoms, histograms, or numerically. Molar masses of reactants and products can also be calculated and balanced to demonstrate conservation of mass.
