If your outdoor security light won't turn off, it's most likely because of one of these problems:The sensitivity settings are too highThe duration settings are too highIt's stuck in auto modeSomething in the light itself is defectiveNot sure which one is your problem? Don't w ...

How to Replace an Outlet That's Controlled by a Light Switch
Some lights have devices in them, that hold an electric charge, for a little while, and in the case of 'LED Lighting', this device does not completely deplete itself. This is the reason that LEDs have residual stored energy. On the other hand you ...

Light Will Not Turn Off With Wall Switch | Hunker
Turn it down a bit and the light should go off a bit more often. Reset It - If your sensor light has an on/off switch located somewhere inside, pay close attention to how you turn it on and off. If you flip the switch, by accident or on purpose, and then flip it back again right away, it could automatically get stuck in the auto-on position.

Get Turn Off the Lights - Microsoft Store

4 great ways to control your home's lights with your phone ...
In fact, 90 percent of the energy incandescent lights use is given off as heat and only about 10 percent results in light. Therefore, turning off incandescent light bulbs is going to save more energy than turning off halogen lights or the far more energy-efficient compact fluorescent light and light emitting diode light bulbs.

Facts About Turning Off Lights to Save Energy | Sciencing
If not, then the light switch will simply turn off the whole outlet, as well as the entire circuit following that outlet. Removing this piece means that only one of the receptacles will be powered by the light switch, leaving the other receptacle always on for other devices.

Why Do My LED Lights Glow when Switched Off? - LampHQ
Turning off fluorescent lights for more than 5 seconds will save more energy than will be consumed in turning them back on again. Therefore, the real issue is the value of the electricity saved by turning the light off relative to the cost of changing a lightbulb. This in turn determines the shortest cost-effective period for turning off a ...

When to Turn Off Your Lights | Department of Energy
If a light switch won't turn off, it could be because it's miswired or just a bad switch. You can test the switch with a voltage tester to determine which is the problem. If the switch is bad, you should replace it because you can't fix it. If the switch is miswired, it's easy to rewire.

Why Won't My Motion Sensor Light Turn Off?
When I flip the switch to my kitchen light off, the 2 bulbs remain very dimly lit. So it looks like there's still AC current flowing to power the bulbs just a little bit. FYI, I replaced the incandescents with LEDs so they don't draw too much power and won't get hot to the touch. And am wondering how I can get those lights to turn completely off.

Any electricians? - New light switch won't turn off light ...
If you turn off your lights and the bulbs are still glowing a little bit, or one of the bulbs in your circuit doesn't want to shut all the way off, you have what we call a "ghost current" in your circuit. This happens when there is excess energy leaking into the bulbs even when the switch is in the off position.

Switch Off My Lights
LED lights glow when switched off. After switching to LEDs or when replacing a faulty LED lamp in some cases the LED continues to glow weakly after turning the light switch off.Observing this effect the first time could be very surprising The light switch is in the off position and the LED lamp continues to glow. In most of these cases the LED just lights up very weakly but also this could be ...
