TB1-2840-229-20-25 ALL UH--1 And AH-1 series helicopters with T53 Engine installed and all spare T53 Engines, mandatory installation of rotary (oil) pump scavenge strainer element (chunk screen) TB1-2840-229-20-23 AH-1 And UH--1 (T53 series engine) verification of time on T53 engine components requiring historical data reports

T53-L-703 - Fixed-wing, Rotor-wing, and Turbine Engine Support

The T-53-L-13 engine is a Free Power type turbine. Free power indicates that engine operation involves two mechanically independent internal stages (systems). The compressor rotor and gas producer turbine rotors makeup the n 1 stage, and the power turbine rotors with their output power shaft makeup the n 2 stage. The symbol ' n ' refers to rotation (rpm) of the two independent stages.

Lycoming T53 - Wikipedia

T53-L-13A and a T55-L-1A Lycoming gas turbine engine. In addition, the combustor for each engine was tested separately under laboratory V conditions simulating engine operation, with similar measurements of gaseous emissions. --Engines were selected from those available which performed within the guaranteed-range;
