Tamron AF28 200mm F/3.8 5.6 LD (Asp) IF Super 35mm Zoom user reviews : 4 out of 5 - 67 reviews - photographyreview.com

Tamron 28-200mm f/3.8-5.6 XR Aspherical IF Macro AF Review
The world's smallest, most lightweight 28-200mm high magnification zoom lens. With a minimum focal distance over the entire zoom area of 49cm, and a maximum magnification of 1:4 (at 200mm), this remarkable lens achieves high magnification zoom performance with the compact size of a standard zoom lens. Through XR (Extra Refractive Index) glass and efficient use of aspherical lenses, Tamron has ...

Tamron Autofocus 28-200mm f/3.8-5.6 XR Aspherical (IF) ...
The story of Tamron's all-in-one zoom lenses begins with the Model 71D, an SLR lens introduced in 1992. This lens featured a focal length of 28-200mm and a 7.1x zoom, one of the highest among SLR lenses in those days. Development of this lens began in 1989, nearly three years prior to its release.

Tamron AF 28-200mm F/3.8-5.6 LD Aspherical (IF) 171D ...
The Tamron 28-200mm provides a remarkable 19.3" minimum focusing distance throughout the entire zoom range, and a macro magnification of 1:4 at 200mm. For example, you can shoot an object about the size of a postcard and fill the frame completely. Features 25% More Compact than previous model Extremely Lightweight only 12.5 ounces

TAMRON | 28-300mm F/3.5-6.3 Di VC PZD

Tamron AF28 200mm F/3.8 5.6 LD (Asp) IF Super 35mm Zoom ...
An Exceptional All-In-One Zoom For Full-Frame DSLRs Since the launch of its first versatile high-performance, high-power zoom, the 28-200mm (Model 71D) in 1992, Tamron has continued to expand its long-range zoom portfolio.

Tamron Camera Lenses 28-200mm Focal for sale | eBay
Frankly, you'd get better results at 100-200mm focal length by using the 18-55mm kit lens and the digital zoom. Interestingly the old Minolta 28-100mm lens (also a cheap zoom for film cameras) is much better and IMHO quite usable. The Sony 55-200mm is better throughout the range than this Tamron, though obviously lacking the short end.

Tamron AF 28-200mm F/3.8-5.6 XR Di Aspherical (IF) Macro ...
The Tamron 28-200mm is lightweight at 12.5oz (354g), small for a zoom lens, and is only three inches tall. This makes it a little more discrete than some other lenses for street photography. Although since I am tall and have bright red hair, discretion isn't something I value particularly highly.

FM Reviews - Tamron 28-200MM F/3.8-5.6 XR Aspherical (IF) ...
Manufacturer description: Similar in length to a typical 3x DSLR kit lens at just 3 inches long., the Tamron 28-200mm is a useful super-zoom on full-frame DSLRs and offers an effective focal length span of 42-350mm on APS-C cameras. Focus is internal, and optical construction comprises 15 elements in 14 groups, including XR (Extra Refractive) glass to enhance performance.
