Tandberg Codec Password - Cisco Community
TMS: TMS actually uses the local windows accounts on the box it is installed. If you can access the OS then you can probably access TMS. The approach here would depend on whether your TMS is in a domain or if it were deployed as a standalone system. If in a domain, then there are likely AD permissions groups that can be used to grant access.

Tandberg Administrator Guide
There is a global setting in Cisco TMS (Administrative Tools > Configuration > General Settings > General Settings pane > TANDBERG System Phone Books) that allows administrators to select whether Corporate Directory, Global Directory, or both should be used in their network.

Tandberg Management Suite User Guide
By default, there is no admin menu password set unless its been already set by the the admin/user. If you can access the codec's API via its IP address using telnet/SSH you can erase or change the menu password that was set using xconfiguration (refer on the commands below). By default, the IP username and password of the codec is TANDBERG. If you don't have an access on codec using IP (telnet/SSH), access it physically using the serial port of the codec.
