Technological Innovation and Economic Growth | Mercatus Center

Macroeconomic performance and outlook GDP contracted by 12.8% in 2019 due to poor performance in mining, tourism, and agriculture. Foreign currency and electricity shortages affected mining and tourism. Agriculture shrank about 15.8% due to cyclone Idai in March 2019, prolonged drought, livestock diseases, and currency shortages reducing the availability of inputs.

technological innovation and economic performance

Most economists agree that technological innovation is a key driver of economic growth and human well-being. Negative cultural attitudes about technology and its disruptive effects could threaten reaping these benefits. Policy responses that reflect such attitudes (and discourage innovation) risk triggering economic stagnation, decreased economic dynamism, and lower living
