The anatomy of architecture : ontology and metaphor in ...

The Foundational Model of Anatomy Ontology (FMA) is a reference ontology for the domain of anatomy. It is a symbolic representation of the canonical, phenotypic structure of an organism; a spatial-structural ontology of anatomical entities and relations which form the physical organization of an organism at all salient levels of granularity.

Foundational Model of Anatomy ontology - About

Analysis of Batammaliba Architecture. Between the eyes is a seam that leads to a house horn that is viewed

as the navel of the home. The house horns, which as small clay projections that jut out from the top of the entrance way and create expressions that go all the way towards the ground, has multiple representations.
