This scattering creates the appearance of a blue sky. When portraying the blue sky in a painting, it is paramount that the spectrum of colors used is wide. There are two simple ways of doing this. First, select a dominant hue of blue and then find the two analogous hues (hues that would be adjacent to its left and right on a color wheel).

Painting Blue Sky
Yet, scientifically speaking, the sky and the oceans aren't really blue—or at least not in the same way the soil is brown or leaves are green. It's a big problem for most of art history. You can't take the blue of the sky, grind it up with a mortar and pestle, then throw it on a canvas.
