The Black Death, 1346-1353: The Complete History. The author's painstakingly comprehensive research throws fresh light on the nature of the disease, its origin, its spread, on an almost day-to-day basis, across Europe, Asia Minor, the Middle East and North Africa, its mortality rate and its impact on history.

**The Black Death: The Greatest Catastrophe Ever | History Today**

Consequences of the Black Death. Historians estimate that it reduced the total world population from 450 million to between 350 and 375 million. In most parts of Europe, it took nearly 80 years for population sizes to recover, and in some areas more than 150 years.

**Project MUSE - The Black Death, 1346-1353: The Complete ...**

This synthesis of historical studies of the Black Death undertakes two tasks: to track the epidemic from its origin in the Golden Horde in 1346—not [End Page 514] (as some have argued) in China in the 1330s—through its entry into Europe via Italy in late 1347, up to its departure via Russia in 1353; and to determine the percentage of the population that died in each region as a result. The author upholds the traditional argument that the Black Death was caused by bubonic plague and ...
