which codes are “modifier exempt.” This is an awful lot of information to take in regarding Category I CPT codes, so let’s review briefly.

The Best Ways to Teach Yourself to Code

aka Book Codes. Book cipher is a kind of secret code, that uses a very common article (a book) as the key. All they have to do is to transmit the location codes that are needed to pinpoint specific words in that book. If you don't know which book, no way of cracking! Agents share a common book (the 'key') that they both need to have in possession.

The Code Book: The Science of Secrecy from Ancient Egypt ...

Book cipher. Traditionally book ciphers work by replacing words in the plaintext of a message with the location of words from the book being used. In this mode, book ciphers are more properly called codes . This can have problems; if a word appears in the plaintext but not in the book, it cannot be encoded.
