Debt deflation, Fisher and Keynes Irving Fisher developed his debt-deflation theory of depressions in his 1932 book Booms and Depressions. The book grew out of an invitation to address the American Association for the Advancement of Science.

Irving Fisher - Wikipedia

His Debt-Deflation Theory of Great Depressions (1933) was powerful and resonant, although largely neglected by officialdom, Wall Street, and academia alike. Fisher's theory raised too many uncomfortable questions about the roles played by the Federal Reserve, Wall Street, and Washington in propagating the conditions for credit excess and the debt deflation that followed.

Irving Fisher on Debt, Deflation, and Depression | Seeking ...

This column rehabilitates Irving Fisher's debt-deflation theory to explain the current crisis. It suggests that fiscal stimulus will do little to prevent the crisis from becoming a protracted slump because the problem lies in finance. A cure will require reversing deflation and res
