and other marine ecosystems for their existence. They include animals such as seals, whales, manatees, sea otters and polar bears. They are an informal group, unified only by their reliance on marine environments for feeding and survival. Mysticeti (baleen whales) . Odontoceti (toothed whales, except river dolphins)

Marine mammal - Wikipedia

The allantois (plural allantoides or allantoides) is a hollow sac-like structure filled with clear fluid that forms part of a developing amniote's conceptus (which consists of all embryonic and extra-embryonic tissues). It helps the embryo exchange gases and handle liquid waste. The allantois, along with the amnion and chorion (other extraembryonic
