analyzes the lexicon of a specific language. A word is the smallest meaningful unit of a language that can stand on its own, and is made up of small components called morphemes and even smaller elements known as phonemes, or distinguishing sounds. Lexicology examines every feature of a word - including formation, spelling, origin, usage, and definition.

The Linguistic Society of America observes that linguistics is a field of science that is almost 3,000 years old. Modern linguists primarily concern themselves with either theoretical or applied linguistics. Their research includes many facets of language and language structure, which can be studied at various levels.
