The Human Instinct : How We Evolved to Have Reason ...

Humans still instinctively crave that high-calorie diet, even though our days of hunting are pretty much over. You may not want to admit it, but you crave that meat and potato more than the beet salad -- unless of course, you're a vegetarian. However, a lot of vegetarian foods are shaped and flavored like meat.

Social Instinct: Being aware of your basic instincts and yourself can help you on your journey to self-discovery, and it can give you more control in situations in the future. Creating a better balance in your life can give you a greater harmony and allow you to thrive as your true self.

The Human Instinct How We

In The Human Instinct, he rejects the idea that our biological heritage means that human thought, action, and imagination are pre-determined, describing instead the trajectory that ultimately gave us reason, consciousness and free will. A proper understanding of evolution, he says, reveals humankind in its glorious uniqueness—one foot planted firmly among all of the creatures we've evolved alongside, and the other in the special place of self-awareness and understanding that we alone ...

Instinct - Wikipedia

It doesn't matter what the color of your skin is or where you were born. It doesn't matter if you're rich, poor, young, elderly, sick, healthy, or unique. Everyone in the world holds an inherent set of instinctive behaviors. Some of the behaviors include a collection of reflexes. Scientists continue to examine the purpose of these instincts and develop hypotheses on their function.

Welcome to Instinct the Decision-Making Company

We have thousands of instincts, not just two. There was a study where scientists placed babies on glass with the illusion of a cliff made out of a blanket under the glass. The babies crawled on the "safe" side but would not crawl past the cliff ev...

3 Basic Instincts: Which Dominates You and How It Shapes ...

Human instincts evolved long ago when we lived off the land as hunter-gatherers and took refuge in simple shelters like caves. Although our instinctive behaviors were adaptive then (that is, they enhanced our ability to survive and reproduce), many do not work so well in modern man-made environments.
