THE IRIDESCENCE OF BIRDS | Kirkus Reviews

Iridescence (also known as goniochromism) is the phenomenon of certain surfaces that appear to gradually change color as the angle of view or the angle of illumination changes. Examples of iridescence include soap bubbles, feathers, butterfly wings and seashell nacre, as well as certain minerals.It is often created by structural coloration (microstructures that interfere with light).

The Iridescence Of Birds A

The Iridescence of Birds: A Book About Henri Matisse is a 5-star example of the best in picture book biographies. The book focuses on Matisse's earliest artistic inclinations and influences. The Iridescence of Birds: A Book About Henri Matisse ...

The title springs from Matisse’s love of pigeons. He was fascinated by their “sharp eyes” and “red feet.” And he particularly loved watching their colors change as they moved—the titular “iridescence.” Raising pigeons, it seems, was the perfect pastime for this quiet, color-loving boy who would become a brilliant painter. Glorious.
