In scientific research. Guinea pig strains used in scientific research are primarily outbred strains. Aside from the common American or English stock, the two main outbred strains in laboratory use are the Hartley and Dunkin-Hartley; these English strains are albino, although pigmented strains are also available.

Book Review: The Laboratory Rabbit, Guinea Pig, Hamster ...

Guinea pigs and rabbits share a lot of common needs. As small herbivores they have similar diets, and use similar cages and bedding. Rabbits, however, need much more space, and are more likely to bite. Guinea pigs are more fragile and do not react well to rough handling.
