(NIDL)A global division of labour associated with the growth of transnational corporations and the deindustrialization of the advanced economies. The most common pattern is for research and development in more economically developed countries, and cheap, less skilled labour in less economically developed countries. See Marin (2006) J. Eur. Econ. Ass. 4, 2-3 on outsourcing

The New Division Of Labor

In economics, the new international division of labour (NIDL) is an outcome of globalization.The term was coined by theorists seeking to explain the spatial shift of manufacturing industries from advanced capitalist countries to developing countries—an ongoing geographic reorganisation of production, which finds its origins in ideas about a global division of labor.

New international division of labour - Oxford Reference

Definition: Division of labour is an economic concept which states that dividing the production process into different stages enables workers to focus on specific tasks. If workers can concentrate on one small aspect of production, this increases overall efficiency - so long as there are sufficient volume and quantity produced.

Division of labor | Definition of Division of labor at ...

Division of labor combines specialization and the partition of a complex production task into several, or many, sub-tasks. Its importance in economics lies in the fact that a given number of workers can produce far more output using division of labor compared to the same number of workers each working alone. Interestingly, this is true [...]
