### **Pipefitter.com - Home**

Pipe fitters plan and test piping and tubing layouts, cut, bend or fabricate pipe or tubing segments and join those segments by threading them, using lead joints, welding, brazing, cementing or soldering them together. They install manual, pneumatic, hydraulic and electric valves in pipes to control the flow through the pipes or tubes.

### **Pipefitters Union Recruitment Video**

Pipefitters may spend some time at the installation location but will spend far more time manipulating and creating the pipes than working at the actual installation location. There is a risk of injury in this occupation, as fitters work with power tools and heavy equipment frequently.
