The Psychology of Environmental Decisions

Traditionally, environmental psychologists focused on how the physical environment (e.g., buildings, noise, pollution, and the weather) affects us. More recently, much research is directed at explaining behaviour that affects the quality of the environment, for example, through energy use, water use, vehicle use, and land use.

The Psychology Of Environmental Problems

After outlining current environmental difficulties, the authors demonstrate how 6 major approaches in psychology (social psychological, psychoanalytic, behavioral, physiological, cognitive, and holistic) can be applied to environmental problems.

Environmental psychology - Wikipedia

psychological predispositions influence people's willingness to engage with environmental issues and behave in pro-environmental ways (17). We go on to consider how people build on these existing predispositions to develop mental models of environmental problems, especially those of a dynamic nature.
