PROFESSIONALISM. Spanning the Civil War to the First World War, the rise of American professionalism brought about the model of a modern career: a vocation that claims service, not moneymaking, as its aim; that privileges expertise; that defines and protects systems of education that confer such expertise; and that takes for granted the professional's desire for upward mobility.

Professional work conditions (and not only the general ideology) foster individualism. The professional's sense of power and authority flows not only from his actual command over special knowledge but also from his control over interpersonal situations. The first established professions—medicine, law, the ministry, and architecture—were typically concerned with the problems of individuals.

The particular relation that professionalism bears to individualism and to the subjective illusion deserves to be noted. Their special competence empowers professionals and experts to act in situations where laymen feel incompetent or baffled. In fact, the assumption by the public that the expert is competent creates a sort of pragmatic compulsion for the expert: to certify his worth in the ...
