The Social Context Of Learning

Social learning theory is a theory of learning process and social behavior which proposes that new behaviors can be acquired by observing and imitating others. It states that learning is a cognitive process that takes place in a social context and can occur purely through observation or direct instruction, even in the absence of motor reproduction or direct reinforcement.

Social learning theory - Wikipedia

The social environment, social context, sociocultural context or milieu refers to the immediate physical and social setting in which people live or in which something happens or develops. It includes the culture that the individual was educated or lives in, and the people and institutions with whom they interact. The interaction may be in person or through communication media, even anonymous ...

Social environment - Wikipedia

Social Learning. Social learning theories suggest that children learn to exhibit aggressive behaviors because they observe others acting aggressively and can see how these behaviors are reinforced over time (Bandura, 1973). Social learning theories emphasize the importance of the social context and posit that individuals can learn by observing ...
