NH 3 is an important N-containing intermediate in solid fuel combustion, an efficient NO reducing agent and a carbon-free fuel. The transformation of NH 3 is fairly complex in furnace and dominates the final NOx emission level. In this work, the effect of the CO/O 2 /CO 2 system on NH 3 transformation was researched in a self-designed flow reactor in a wide temperature range, 1073-1773 K.

Selective oxidation of aliphatic alcohols under mild and base-free conditions is a challenging process for organic synthesis. Herein, we report a one-pot process for the direct oxidative esterification of aliphatic alcohols that is significantly enhanced by visible-light irradiation at ambient temperatures. The new methodology uses heterogenous photocatalysts of gold-palladium alloy ...

Re : Transformation du CO2 en O2 Bonsoir, Euh, comme j'ai l'impression que vous dites que le CO 2 se transforme directement en O 2 lors de la photosynthèse (et que donc lorsqu'un être vivant respire, il se produit directement la réaction inverse), je tenais juste à intervenir pour rappeler que ce n'est bien sûr pas le cas.

Haldane Transformation This transformation assumes that nitrogen is physiologically inert. Therefore, the volume of inspired nitrogen must equal the volume of expired nitrogen. 3 (VI FIN 2) = (VE FEN 2) 4 VI = (VE FEN 2) / FI N 2 5 VI = VE (FEN 2 / FI N 2) where FIN 2 = fraction of inspired nitrogen = 0.7808 therefore, FEN 2 = [0.99063-(FEO 2 ...
