Tropic of Cancer | What is, history, characteristics ...

Tropic of Cancer by Henry Miller Preface by Anais Nin Introduction by Karl Shapiro "There is an eager vitality and exuberance to the writing which is exhilarating; a rush of spirit into the world as though all the sparkling wines have been uncorked at once; we watchfully hear the language skip, whoop and wheel across Miller's page." —William H. Gass, The New York Times Book Review

The Tropic Of Cancer By

The Tropic of Cancer, which is also referred to as the Northern Tropic, is the most northerly circle of latitude on Earth at which the Sun can be directly overhead.This occurs on the June solstice, when the Northern Hemisphere is tilted toward the Sun to its maximum extent. It also reaches 90 degrees below the horizon at solar midnight on the December Solstice.
