In probability theory and related fields, a stochastic (*/s t oʊ ? k æ s t ? k /*) or random process is a mathematical object usually defined as a family of random variables. Many stochastic processes can be represented by time series. However, a stochastic process is by nature continuous while a time series is a set of observations indexed by integers.

The parameter κ corresponds to the speed of adjustment to the mean, θ is the long-run mean, and σ is the volatility.
