positions for Mustangs: P, R, N, D,
and M.

6R80 Transmission Leak Diagnosis | Sonnax

- Ford measures the flow rate for all of their solenoids used in the 6F30, 6F50, 6R80 and 6R140 applications.
- Transmission calibration software is then loaded, taking into consideration the individual solenoid flow characteristics and their position in the valve body.

The ZF6HP was designed and manufactured by ZF and later selected by Ford as their choice for a RWD 6-speed. Ford licensed the design and started to manufacture the 6R60/80, with a few alterations. Both manufacturers use only one case pressure tap: the WK port on the driver side of the bell, just above the cooler lines.

The 6R60/75/80 is a ZF6HP style transmission specifically fitted for Ford. This transmission can be found in the 2005 Navigator, 2006 Explorer and Mountaineer, 2007 Expedition, 2008 F150 and 2010 Mustang. In 2010, with the introduction of the 6R80 model transmission, changes were made and a low one-way clutch OWC was added to the transmission.
