Training Obstetrics Gynaecology Oxford Specialty
Gynaecology or gynecology (see spelling differences) is the medical practice dealing with the health of the female reproductive system.Almost all modern gynaecologists are also obstetricians (see obstetrics and gynaecology).In many areas, the specialties of gynaecology and obstetrics overlap. The term means "the science of women". Its counterpart is andrology, which deals with medical issues ...

Our consultants - Oxford University Hospitals
The medical model is a biopsychosocial model assessing a patient ' s problems and matching them to the diagnostic construct using pattern recognition of clinical features. Diagnostic constructs allow for researching, communicating, teaching, and learning useful clinical information to influence clinical decision-making. They also have social and administrative functions such as access to benefits.

Orthopaedic Surgery | Singapore General Hospital
Obstetric intervention originally consisted of extraction of the baby, usually by the breech, to save the mother's life in obstructed labour. Forceps, introduced in the 17th century, were later refined by men-midwives like William Smellie. In Victorian times, Simpson championed chloroform anaesthesia, Lister pioneered antiseptics, and caesarean section was introduced.
