## **Book Review, Tuning the A-Series Engine - Mini Mania**

This is why the 6" X 3 1/4" deep filters are preferred by those who go for serious power increases with a B Series engine. Induction pulse problems aside, the airflow capacity of the little conical or pancake filters is more appropriate to a mildly power-enhanced A Series engine, such as is fitted to the MG Midget or the Austin Healey Sprite.

### **Inside an A-series engine**

Austin Motor Company's small straight-4 automobile engine, the A series, is one of the most common in the world [citation needed]. Launched in 1951 with the Austin A30, production lasted until 2000 in the Mini. It used a cast-iron block and cylinder head, and a steel crankshaft with 3 main bearings. The camshaft ran in the cylinder block, driven by a single-row chain for most applications, and ...
