List of epidemics - Wikipedia

These conditions resulted in repeated outbreaks of cholera, dysentery, TB, typhoid fever, influenza, yellow fever, and malaria. By 1900, however, the incidence of many of these diseases had begun to decline because of public health improvements, implementation of which continued into the 20th century.

Pasteur Institute - Wikipedia

Fracastorius correctly surmised that tiny, free-living organisms, which he referred to as "seeds of disease," existed in nature. Despite being invisible to human eyes, he postulated that these disease-causing organisms could be transmitted from person-to-person directly or via fomite intermediaries, thereby spreading contagion (Gensini and ...
