We provide a range of services to the book industry internationally, aiding the discovery and purchase, distribution and sales measurement of books.

The 7 Best Ultralight Reels of 2021 - TripSavvy

Development. Development of the SportStar is closely entangled with its Eurostar sibling; while the former was specifically developed to meet the needs of the light-sports aircraft (LSA) sector of the general aviation market, the lighter EuroStar was designed for the ultralight-microlight (UL-ML) portion of the European market. The two aircraft, which have been grouped together in the same ...

Introducing the Basic Ultralight Gliders. The Pig1, Goats1 & 4, and Bug4, are home built, basic ultralight gliders. Technically these aircraft are ultralight sailplanes, but they are best described as "airchairs", which are simple, slow flying gliders with the pilot sitting out in the open air rather than inside a fuselage.

Basic Ultralight Glider

The graphite construction also has a practical function, keeping the reel's overall weight to just 6.2 ounces. The handle is made from aircraft-grade aluminum, while slow oscillation gearing allows the line to lay evenly on the braid-ready spool.
