Media richness theory, sometimes referred to as information richness theory or MRT, is a framework used to describe a communication ability to reproduce the information sent over it. It was introduced by Richard L. Daft and Robert H. Lengel in 1986 as an extension of information processing theory. MRT is used to rank and evaluate the richness of certain communication media, such as ...

### Definition and Examples of Senders in Communication

Governments could change their rules and regulations, which could have an effect on a business. For instance, after the accounting scandal in the early twenty-first century, the United States Securities and Exchange Commission became more focused on corporate compliance and the government introduced the Sarbanes-Oxley compliance regulations of 2002.
