sum of glacier and ice sheet contributions is now the dominant source of GMSL rise (very high confidence). GMSL from tide gauges and altimetry observations increased from 1.4 mm yr⁻¹ over the period 1901–1990 to 2.1 mm yr⁻¹ over the period 1970–2015 to 3.2 mm yr⁻¹ over the period 1993–2015.

Chapter 4: Sea Level Rise and Implications for Low-Lying ...

This Community features the research findings from the postgraduate students. These findings are submitted as theses/dissertations. Post graduate students of the KNUST community are strongly encouraged to ensure soft copies of their research findings are submitted to the School of Graduate Studies for archiving in the digital repository.

KNUSTSpace: Theses / Dissertations

Decentralization or decentralisation is the process by which the activities of an organization, particularly those regarding planning and decision making, are distributed or delegated away from a central, authoritative location or group. Concepts of decentralization have been applied to organizational dynamics and management science in private businesses and organizations, political science, and public administration.

Varieties Governance Dynamics Strategies Capacities

Adaptation involves producing more food where needed, moderating demand, reducing waste, and improving governance (Godfray and Garnett 2014 470) (see Section 5.6 for the significant synergies between adaptation and mitigation through specific practices, actions and strategies).
