*This causes the sensor to switch on and off, producing a digital signal that the PCM reads to determine crank position and speed. Crank Position Sensor Strategies: If a crank position sensor fails, the engine will die. The engine may, however, still crank but it won't start. Most problems can be traced to faults in the sensor's wiring harness.*

*i have a volvo d12-456 i  
cant get running. i just put  
a head gskt on it. there is  
no power to injectors. i did  
not pull this engine down  
but got called to put it  
back together [stupid me].  
im thinking they are  
constant power to injectors  
and they fire with the  
ground. never worked on a  
volvo before though i have  
30 years diesel experence.  
looking for help thanks dan*
