We Are Our Brains: A Neurobiography of the Brain, from the ...

Research. Through his years of research, Swaab, according to his own words, came to the deterministic and materialistic conclusion that brains are not things we have, but rather brains are what we are: the physical and chemical processes in our brains determine how we react and who we are. [citation needed] Currently....

We Are Come To Outlive Our Brains (Live)

We will come to outlive our brains (I see you in the distance as I) Nine cubes (Repeat x 12) Woah-oooooh I'm the glue in your magnet (Repeat x 4) I'm the glue in your magnet I'm the glue in your magnet (We will come to out live our brains) We will come to outlive our brains (I'm the glue in your magnet) I see you in the distance as I frown

What Makes Our Brains Special? - Scientific American

Why our brains are more highly attuned to negative news. There is a greater surge in electrical activity. Thus, our attitudes are more heavily influenced by downbeat news than good news. Our capacity to weigh negative input so heavily most likely evolved for a good reason—to keep us out of harm's way.
