*Talk:White people/Archive 23 - Wikipedia*

*Just saw this documentary on Smithsonian Channel the other night called "Skin Deep." Scientists have proven that Neanderthal DNA shows that they were light skinned or "white" at least 50,000 years before homo sapiens were. They also had the first red heads. It could be that interbreeding with neanderthals created the first caucasians.*

*Find Your Inner Neanderthal. December 15, 2011 By ScottH under Ancestry. They had bigger brains and muscles, but for some reason Neanderthals died out about 30,000 years ago, while we modern humans survived. ... See Eric's white paper for a technical explanation of the methodology.*

*Neanderthals were the first white people! - Stormfront*

*The Neanderthals lived in areas ranging from Western Europe through central Asia from about 200,000 to between 36,000 and 24,000 years ago. The Neanderthals lived in groups of 30 to 50 individuals, they invented many of the tool types that were to be perfected by fully sapient peoples, they had weapons adequate to deal with both the cave lion and cave bear, they used body paint, buried their dead.*

*Why do people say White people are Neanderthals and Black ...*

*I don't doubt Neanderthals were superior to modern day negroids and australoids. Being that Neanderthals lived very basic lives, they knew how to survive and did what it took. They didn't live in a filthy disgusting chaotic environment the way negroids seem to. Neanderthal or not, I find whites to be be the superior race.*

*An Analysis of "Genetic Evidence of Geographical Groups among Neanderthals" - Part 1 - Abstr & Intro*

*So white people are part Neanderthal? Scientists have found that all non africans have Neanderthal DNA in them, apparently they inbreed with the Neanderthal before killing them all off. It is said to be only 1-4% of their genes though.*

*Whites are superior Thanks to Neanderthal DNA - Stormfront*

*We hypothesized that this "Large X Effect" 23 could explain why chromosome X was more resistant to introgression of Neandertal ancestry than the autosomes. If male hybrid sterility is contributing to our observations, a prediction is that the responsible genes will be disproportionally expressed in testis 24.*
