I am trying to automate Rumba TN3270 7.2 on windows server 2016(AWS) where my web application is also hosted. I have written the VBA script which will do the automation on Rumba. To run the script I have to open the Rumba (.WDM file). We have wrapped the all code in simple console .net app and set that in task scheduler.

Windows Server 2016 Automation With

With Windows Server 2016 and the WMF 5.0, we reduced the effort needed to reconfigure changes in our environment using PowerShell and DSC. We used DSC resources to build small, modular configuration change actions. Once in place, those DSC resources can be combined and manipulated with PowerShell to make changes on one or more servers.
